The Gulf State Park Pier

Current facts . . .

Gulf Shores/Orange Beach, AL - When many people think of Gulf State Park, the first thing that comes to mind is the saltwater fishing pier that was destroyed by Hurricane Ivan in 2004. The 825-foot-long pier was Alabama's most popular place to fish and watch others fish. Hugh Branyon, Gulf State Park's superintendent, says the pier attracted about 250,000 anglers and sightseers each year. On the busiest days, he said, almost 5,000 people would visit the pier.

Construction of a new pier – this one 1512-feet-long and the longest on the Gulf Coast – began in December 2008, and a lot of anglers counted the days until it opened. Some built new fishing rods and planned their vacations to coincide when the pier reopened July 22, 2009. At the official ribbon cutting, the man who once lived under the pier, Andy Andrews, was invited to speak alongside Governor Bob Riley of Alabama!

This might be the easiest way to “catch” Andy out in public. He and his boys do a lot of fishing on this incredible structure.
